

PORTFOLIO

TIA GOONARATNA

PHOTOGRAPHY

My history of photography is scattered around professional work and pleasure. I started my journey in photography in 2010 as an e-commerce studio photographer for ODEL PLC in Sri Lanka. I worked with product photography and model shoots - shooting over 150 products a day and editing them.

My personal work is mostly of people, concerts, landscape, and wildlife; capturing moments. I see the world through my lens and is always looking for the perfect angle to capture the moment.

After taking a hiatus from professional photography for writing and lecturing, I currently take freelance work in photography.

Current equipment: Canon EOS 800D with 50mm and 18-55mm lenses.
